

TATTOO EDITION

BASED ON THE MERCEDES-AMG GT R PRO

RIDE OR DIE

The **Tattoo Edition** by Carlex Design is a really naughty version of the most dynamic Mercedes model: the AMG GT R PRO. This agile and aggressive beast with a bold silhouette has been given a totally new look: the car's body has been brushed and wears a bottle green shade to mark the car's racing heritage.

BESPOKE WHEELS

The Tattoo Edition sits on bespoke brushed silver rims whose tapering form makes the car even more stylish and expressive.

INTERIOR

The restyled interior of the Tattoo Edition is a completely new level of lavishness: it features stretches of sumptuous deep green leather and black Alcantara®. Feel like someone is watching you? It's the skulls, inspired by the old school tattoo art, which have been meticulously applied on the upholstery. Feel the gloomy ambient of a real tattoo studio!

Navigation, Phone, and other control buttons on the overhead console.

Interior lighting and mirror controls on the overhead console.

Interior rearview mirror.

Steering wheel with a central 'S' logo and 'AMBI-CLIMATE' text.

Four circular air vents on the dashboard.

Center console featuring a gear shifter and handbrake.

An idea is the beginning of all things.

Embossed pattern on the driver's side floor mat.

Embossed pattern on the passenger's side floor mat.

Embossed 'Porsche' logo on the center console.

TATTOO EDITION

The Tattoo Edition is a daring breakaway from standard solutions: it's meant for those who are bold enough to grab the wheel of this superb machine. Will you dare to ride it?
