

RACING GREEN
EDITION

MERCEDES G 63 AMG

RACING GREEN EDITION

The exceptional Racing Green line is yet another special edition by Carlex Design, based on the iconic Mercedes G 63 AMG. Following the Steampunk Edition and the Yachting Edition, the Racing Green is a stylish fusion of a sporty character, luxury, and handcraft.

The car's body is a piece of functional art: it has been painted deep emerald green, inspired by British racing green, and hand brushed by our experts, using a unique finishing method.

The Racing Green Edition features a carbon roof and spare wheel cover, massive 22-inch rims, painted dark grey with golden flecks, and a number of bespoke emblems. The subtle side stickers and the golden brown brake callipers perfectly mark the green car's body and reveal a bit of what is going on inside of this special edition vehicle.

RACING GREEN EDITION

INTERIOR

The new interior of the Racing Green is an atmospheric and intimate space. Dark bottle green leather and Alcantara perfectly complement the milk chocolate brown upholstery. The unique perforation pattern, the embossed motifs, and the leather cords have given the car's interior an artistic dimension.

The bespoke sporty seats and the carbon decors placed, among others, on the steering wheel, make the new interior of the Racing Green Edition bold and energetic. The Racing Green by Carlex Design is a perfect choice for the lovers of classic style, handcraft, and a spot of nonchalant boldness.
